LET'S FIND OUT

WHO WE ARE

Founded in march 2018, we are a technology company focused on strong innovation at the intersection of the most current disruptive technologies: VR/AR, Biometrics, Ai, DLTs and IoT.

Based in sunny Portugal (HQ in Almada), our team is currently composed of 20 engineers and PhD, 1 DPO (GDPR + Law), and 3 Administration staff, with a diverse skill-set of expertise, with each member going very deep into his/her own field.

As a rare kind of a 100% independent and self-funded by design startup, we are experiencing rapid growth, and in less than 2 years we conquered sustained profit and industry-leading multinational clients and accounts.

We are a GDPR aware company, and as such, all our solutions are from the ground up, privacy-by-design products & services.

WHO'S TALKING

Ricardo Lopes

QL Mothership Captain

I'm a serial entrepreneur, with a computer science and electronics background, with a legacy of more than 20 years of experience in the hi-tech R&D, and creative industries.

Founded in early 2018, Quantum Leap (aka QL), is my most recent and ambitious project in the tech start-up world so far, and considering its challenges ahead, will most likely be my last one.

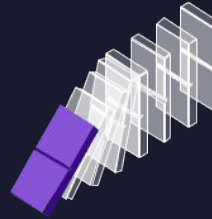

It is the "*final frontier*" for me as a professional in the field, where my full vision for the future of mankind will be developed, and the culmination of many years of intense thinking, experimenting and learning with all the successes, but more importantly, with all the mistakes.

OUR GOALS AS A COMPANY

Independent

We are 100% masters of our own destiny.
We want to keep it that way.

Impact

We aren't just a business.
We are here to make an immediate & significant impact on everyone's lives.

Elevate

Through science & technology we will deliver the tools and platforms to elevate our society into a new era of overall wellness.

OUR HISTORY

2018

QL is founded with 100% own capitals and starts hardware & software R&D

We dive deep into the IoT revolution

2019

2020

We get our feet wet in researching edge Ai & DLTs, and develop and provision security & scalability skills

2021

We continue our roadmap into making a better world through technology innovation

OUR DIVISIONS

IoT

All things IT and IoT.
We develop from the ground up,
all the software and hardware in
our solutions.

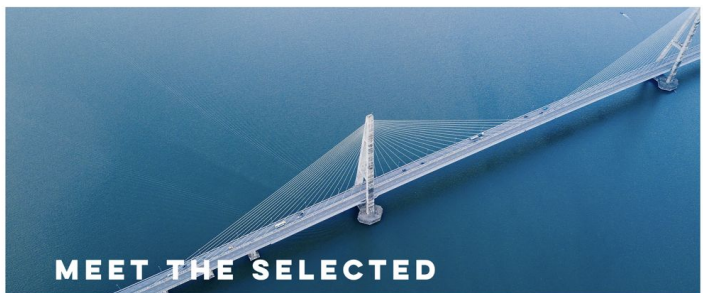

Ai & Biometrics

From computer vision to multimodal
biometrics and liveness detection,
NLP or recommendation engines.
We do it all. Because we can.

The Next Chapter

PORTUGAL FINLAB
SELECTED COMPANIES
MORE

MEET THE SELECTED
INNOVATORS

FIRST BATCH:

Announced on the 30th of October.

Additionally to its two main current divisions in the IoT and AI spaces, Quantum Leap is also in the process of becoming a central bank accredited **fintech**.

We consider this move to be a strategic one in order to natively incorporate payment systems in our hardware and software solutions that offer an unprecedentedly seamless end-to-end user experience.

Proof of this is the fact that QL was one of the very first few selected companies to be included in a special fintech accelerator program called “Finlab” created by the national regulatory authorities, namely, the Portuguese Central Bank (Banco de Portugal) and the mobile values’ market commission (CMVM) .

New Horizons

Our main mission at Quantum Leap is to make an impactful and meaningful contribution into elevating our society's quality of life and purpose, *"one leap at a time"*.

In fact, we are preparing to do so, several leaps at a time, by laying down rock solid financial sustainability foundations for our company, so we can move on and develop our internal projects that are planned to fulfil our mission.

Well, the truth is that they are already underway ... :)

WHAT WE BELIEVE IN

$$E=MC^2$$

“We cannot solve our problems with the same thinking we used when we created them...”

Albert Einstein
